About Route To Success

Route to Success is a student-led club at BASIS Chandler that **empowers women and minorities to pursue careers in STEM** (Science, Technology, Engineering, and Mathematics). Our mission is to **close the gender gap in STEM** by giving students the skills, resources, and confidence to succeed.

We host events such as math competitions, STEM festivals, and workshops to help students strengthen their problem-solving skills, connect with mentors, and explore opportunities in STEM fields.

RTS' 7th Annual Math Competition

Route to Success's Annual Math Competition invites students from **grades 1–5** to challenge themselves with engaging math problems in a fun, inclusive environment.

This year's competition will be held on **November 21st, at BASIS Chandler.** While the competition is hosted at the school, it is an independent event run by Route to Success, with all logistics reviewed and approved by school administration to ensure compliance with school policies.

First launched in 2020 during the pandemic as a virtual event, our competition has since grown into a hallmark community program. Over the years, we've expanded to include corporate sponsorship, prize money, and a storytelling element in our test questions that makes problem solving more engaging! Below are some photos from our event last year:

Our Participants

We welcome a broad and diverse group of young learners, with a special focus on engaging girls and students from underrepresented backgrounds in STEM.

We expect **90+ participants** this year in grades 1-5, with the goal of reaching **120+ students**. In 2025, we hosted 92 students, a 40% increase from the 66 students in grades 1-5 that attended in 2023. When searching our demographics in previous years we saw that:

- 39% identified as female and 61% as male
- 73% in grades 3–5, and 27% in grades 1–2

Our Promotion Plan

Inside our school, we promote the competition by personally visiting study hall classes, making school-wide announcements, and sharing reminders in the weekly newsletter.

Outside of our school, we work closely with our sister primary schools and our local Tamil school, even offering a Tamil translation of our flyer to make our outreach more accessible. Last year, we also contacted middle and elementary schools throughout the Chandler/Gilbert Valley, as well as local enrichment programs such as Kumon and Mathnasium.

This year, we're focusing on **broadening access**:

- Partnering with afterschool programs
- Specifically reaching Title I schools with fewer STEM opportunities
- Offering need-based scholarships by waiving registration fees for families in financial hardship

Our Cause

Each year, all registration proceeds from our competition are donated to a local nonprofit. This year, we are proud to continue supporting **Homeless Youth Connection (HYC)**, a local Phoenix-based organization that provides resources, mentoring, and housing stability to youth experiencing homelessness.

The connection between HYC and RTS is rooted in our shared mission: to give young people the tools, support, and opportunities they need to build a brighter future. By investing in education and empowerment, we hope to not only inspire students through math, but also support those in our community who face barriers to success.

Competition Structure

Sprint Round

Format: 30 questions, 50 minutes (no calculators)
Details: Tests individual speed and accuracy. Problems begin with accessible questions and increase in difficulty.

Target Round

Format: 4 sets of 2 questions each, 6 minutes per set (calculators allowed)
Details: Focuses on depth of problem-solving. Each pair of questions is completed before the next set is distributed.

Why Sponsor Us?

Arizona is ranked **50th in education**, with nearly **75% of schools designated as Title I**. A large proportion of Arizona students lack equitable access to enrichment opportunities outside of the classroom. Route to Success is working to close this gap by creating accessible, engaging math opportunities for a diverse range of students.

- Last year, we celebrated our 6th anniversary with our largest competition yet, due to continued support from our corporate sponsors. Sponsorships allowed us to expand programming, strengthen outreach, and enhance the student experience.
- We introduced **Themed Rounds** in 2024, making math more exciting and approachable. Our dinosaur-themed problems were a huge hit with students!
- In 2026, we are building on this momentum by broadening outreach and reaching a more diverse group of students than ever before!

What Your Contribution Supports

Your sponsorship will directly support:

- Scholarships to cover registration fees for students in financial need
- Meals and snacks for all participants
- Trophies, medals, and prizes for winners
- Supplies and event logistics
- Hosting and maintaining our competition website

We welcome both monetary and in-kind support.

Sponsorship Packages

Diamond Package – $500

- Logo displayed on all event flyers, posters, and digital promotions (school newsletters, social media)
- Company name announced during both the opening and awards ceremonies
- Recognition in a post-event thank-you social media post
- Award named in honor of your company
- Option to present awards to competition winners
- Opportunity to provide promotional items or coupons for participant gift bags

Platinum Package – $250

- Logo featured on event flyers and digital promotions
- Company name announced during both the opening and awards ceremonies
- Recognition in a post-event thank-you social media post

Gold Package – $100

- Logo included on event flyers and digital promotions
- Company name listed in the event program and on the thank-you post

We can provide a W-9, invoice, and ACH electronic payment instructions upon request.
